UI/UX DESIGN SPECIFICATION

WorkRadar: Interface, Visual System and Screen Specifications

The single reference for building the MVP in Google Stitch and the AI-assisted development platform

Author	Gopi Krishna	**Program**	AI Product Management, AIR Tribe — Cohort 40
Version	1.0	**Date**	27 October 2026
Related	PRD v2.1; MVP Decisions & UX Spec	**Status**	Ready for design in Google Stitch

1. DESIGN PRINCIPLES

Principle	What it means in the interface
Radar, not reader	Show who, what, why and when in one line. Full messages stay in Slack, Jira, GitHub and Gmail; every item has an "Open in source" link to the exact message.
Sort first, then filter	Every list has a meaningful default order (by score, time or waiting) and filters to narrow it. Nothing appears in random or purely chronological order unless the PM chooses it.
Colour means something	Colour is reserved for priority, status, calendar event type and team health. Structure is neutral grey; the accent blue marks navigation, links and primary actions.
Nothing is lost	No item is ever deleted. Done, Snoozed and Assigned items move to recoverable views; every PM action is logged in the Activity Log with Undo or Restore.
People are visible	Every item and team row shows the person's photo (from Slack or Google profile), name, title and current state, so the PM sees relationships, not just tickets.
Numbers with context	Every number carries a label and a comparison (for example, "4 blocked · +2 since yesterday"), uses tabular figures and a semantic colour only when it signals risk or success.

2. INFORMATION ARCHITECTURE

Eight destinations in a fixed left sidebar, plus a global top bar. Each destination answers one question.

Navigation item	Question it answers	Main content
Dashboard	What does my day look like?	AI daily brief, KPI tiles, top priorities, calendar with meeting dots, who is blocked, team pulse
Radar	What should I act on, in what order?	Full ranked list of items across all tools; tabs by type; sort and filter bar
Calendar	When can I act, and what meetings do I have?	Month and day views; event dots by type; meeting requests beside free slots
Team	Who is on track, at risk or blocked?	Member cards or table with profile photo, title, status highlight, workload, open items
Activity Log	What have I done today, and can I undo it?	Timeline of the PM's actions with Undo/Restore; Done and Snoozed archives
What Happened	What changed in the last 24 hours?	Team updates grouped by team: merged, shipped, closed, moved
Integrations	Are my tools connected and fresh?	Connection cards per tool with status, last sync, permissions
Settings	How does WorkRadar behave for me?	Theme, AI brief, priority rules, VIP senders, tags, notifications

Top bar (every page): page title and date · global search (Ctrl/Cmd + K) · sync indicator ("All sources synced 2 min ago") · notification bell with count · theme switch (light / dark / system) · profile menu.

3. VISUAL SYSTEM: COLOUR TOKENS

3.1 Base and brand colours

Token	Light theme	Dark theme	Usage
color.bg.page	#F5F7FB	#0B1220	Page background behind cards
color.bg.surface	#FFFFFF	#111A2E	Cards, rows, drawer, popovers
color.bg.subtle	#F1F4F9	#17223A	Table headers, hover rows, inputs
color.sidebar.bg	#0B1B3F	#080F1F	Left navigation background
color.sidebar.text	#AEBBD6	#9AA6BD	Inactive navigation labels and icons
color.border	#E3E8EF	#24314D	Card borders, dividers
color.text.primary	#0F172A	#E6EAF2	Headings, body text, numbers
color.text.secondary	#5B6478	#9AA6BD	Reasons, timestamps, labels
color.accent	#2454E6	#4C7DFF	Active nav, links, primary buttons, focus ring, selected date
color.accent.hover	#1D44BF	#6B93FF	Hover and pressed states

color.accent.tint	#EAF0FE	#1A2A55	AI brief card, selected tab, today's date ring

3.2 Priority colours (rounded-rectangle chip, tinted background)

Priority	Example	Text	Background	Rule
P1 · Critical	P1 Critical	#B42318	#FEE4E2	Score ≥ 70. Only P1 uses red; a P1 row also gets a 3 px left edge in #D92D20
P2 · High	P2 High	#C4320A	#FFE6D5	Score 40–69
P3 · Normal	P3 Normal	#475467	#F2F4F7	Score below 40; collapsed by default on the Radar

3.3 Status colours (pill with dot)

Status describes where an item stands; priority describes how important it is. They always use different shapes (pill with dot versus rectangle) so they are never confused.

Status	Example	Dot	Text	Background	Meaning
Not started	Not started	#98A2B3	#475467	#F2F4F7	New item, no action yet
In progress	In progress	#2E90FA	#175CD3	#EFF8FF	Owner is working on it
Pending / waiting	Pending	#EAAA08	#854A0E	#FEF7C3	Waiting for a response or approval
Blocked	Blocked	#DD2590	#C11574	#FDF2FA	Cannot proceed; needs someone else
Assigned	Assigned	#15B79E	#107569	#F0FDF9	PM delegated it to a teammate
Scheduled	Scheduled	#6172F3	#3538CD	#EEF4FF	Put on the calendar
Snoozed	Snoozed	#7A5AF8	#5925DC	#F4F3FF	Hidden until a chosen time
Done	Done	#17B26A	#067647	#ECFDF3	Closed by the PM; restorable

Dark theme: the same dot colour; background = dot colour at 16% opacity; text = dot colour lightened 25%.

3.4 Item types (neutral chip with icon)

Type	Icon (Lucide name)	Default sort inside its tab
Blocker	lock	Days blocked × people affected, longest first
Escalation	siren	Severity, then newest first
Approval	badge-check	Due date, soonest first; overdue on top
Ask	message-circle-question	Sender weight (founder, customer, lead), then waiting time
Meeting request	calendar-plus	Requested date, soonest first; shows next free slot
Update	activity	Newest first (What Happened only, never on the Radar)

Type chips are neutral (text #344054 on #F2F4F7, icon #667085) so that colour stays reserved for priority and status.

3.5 Calendar event colours (dots and event blocks)

Event type	Colour	Detected from
Team meeting / stand-up	#2454E6	Google Calendar events with internal attendees only
1:1	#15B79E	Two attendees, recurring
Customer / external	#F79009	Any attendee outside the company domain
Review / decision	#7A5AF8	Title contains review, demo, sign-off, planning
Pending request	dashed #EAAA08	Meeting asks from Slack, Gmail or Jira not yet accepted
Free slot	#17B26A outline	Gaps ≥ 30 min in working hours (free/busy)

3.6 Team health highlights (row or card background tint)

State	Example	Rule
On track	On track	No blocked items; workload within capacity
At risk	At risk	An item overdue, or waiting on the PM over 24 h
Blocked	Blocked	At least one open Blocker; row background tinted #FDF2FA
Overloaded	Overloaded	Open items above 1.5 × team average
Away	Away	Slack status away or calendar out-of-office

4. TYPOGRAPHY, SPACING AND LAYOUT

Style	Size / line	Weight	Use
Display	28 / 36	600	Greeting, page title
H1	22 / 30	600	Section headings
H2	18 / 26	600	Card titles
H3	15 / 22	600	Row titles, drawer title
Body	14 / 20	400	Text, extracts
Small	13 / 18	400	Reasons, metadata
Caption	12 / 16	500	Chips, timestamps
Overline	11 / 14, +6% tracking, caps	600	Section labels
KPI number	30 / 36, tabular	700	Dashboard tiles

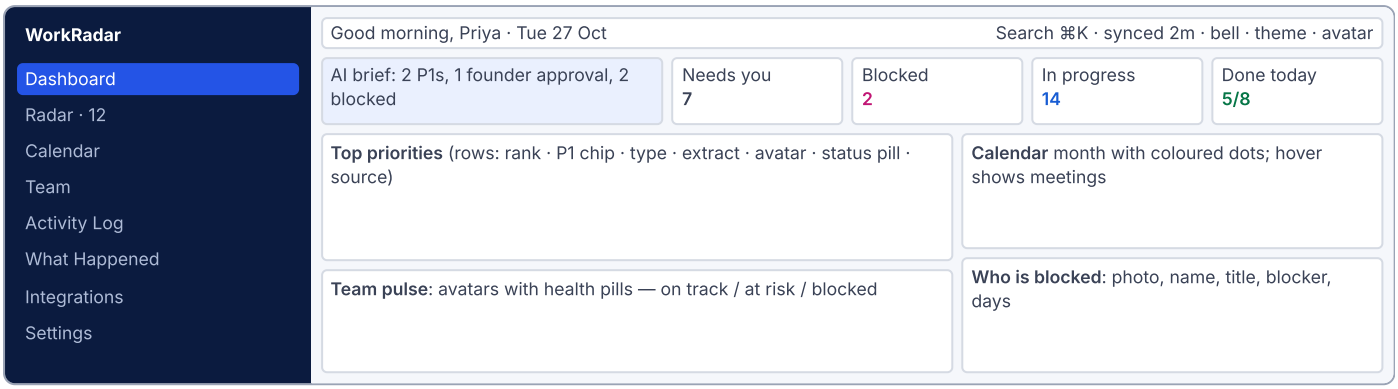

Token	Value
Font	Inter (UI); JetBrains Mono or Inter tabular for IDs and times
Spacing scale	4 · 8 · 12 · 16 · 20 · 24 · 32 · 40 px
Radius	Chip 6 · button/input 8 · card 12 · drawer/modal 16 · avatar full
Elevation	Card: 0 1 2 rgba(16,24,40,.06) · Popover: 0 12 24 rgba(16,24,40,.12)
Sidebar	248 px (collapsed 72 px, icons only)
Top bar	64 px
Content	12-column grid, 24 px gutter, max 1440 px
Right rail	320 px on Dashboard and Radar
Touch target	Minimum 40 × 40 px; rows 56 px
Icons	Lucide, 18 px, 1.75 px stroke; no emoji
Motion	150 ms ease-out; drawer 200 ms slide

5. COMPONENTS

Component	Anatomy	States and behaviour
Radar row	Rank number · priority chip · type chip with icon · one-line extract (max 12 words) · reason ("why: waiting 2 days") · source mark + reference (JIRA · AUTH-221) · person avatar stack (owner first) · status pill · age · action buttons	Hover: background `#F1F4F9`, actions appear. P1 adds 3 px red left edge. Click row → detail drawer; click source → opens exact message in a new tab.
Person chip / avatar	Photo from Slack or Google profile (32 px rows, 40 px cards) · presence dot (green online, grey away) · name · title on hover or second line	No photo → initials on a colour from the 8-colour avatar set. Hover card: name, title, team, open items, Slack DM link, email link.
KPI tile	Label (overline) · big number · comparison line · optional mini progress bar	Number colour neutral unless it signals risk (blocked, overdue) or success (done). Click → filtered Radar.
Completion ring	Ring 56 px · percentage centre · "Done for the day" · "5 of 8 closed"	Green ≥ 80% (`#17B26A`), amber 50–79% (`#EAAA08`), red below 50% (`#F04438`). Updates live.
Calendar month	7-column month grid · selected date filled accent · today ringed · up to 3 coloured dots per day by event type, then "+n"	**Hover on a date** → popover listing that day's meetings: time, title, colour bar, attendee avatars, "Open in Google Calendar", and pending requests with "Copy free slot".
Filter bar	Search field · type tabs with counts · dropdowns: Source, Priority, Status, Person, Team, Date · Sort menu · Clear all	Active filters shown as removable chips. Filters persist per page for the session.
Item detail drawer	480 px from the right · header (chips, title, source refs) · AI context: 2–3 bullet notes · "Why ranked" with score bars T/U/S/W/I · people · timeline · linked items · actions	Esc closes. Shows "Open in Slack / Jira / GitHub / Gmail" as the primary button. Never shows the full thread.
Action buttons	Open source (primary) · Done · Snooze (menu: 1 h, after next meeting, tomorrow 9:00, next week) · Assign (people picker with 3 suggestions)	Every action shows a toast: "Marked done · Saved in WorkRadar only · Undo" for 10 s, and writes to the Activity Log.
Team member card	Avatar 40 px · name · title · team · health pill · task progress bar with % · open / blocked counts · last activity · Slack and email icons	Card background tinted by health for Blocked and At risk. Click → member panel with their items.
Integration card	Tool logo · name · description · status (Connected / Needs attention / Not connected) · last sync · toggle · "Manage"	Toggle off pauses sync, keeps history. "Needs attention" shows amber and a Reconnect button.
Banners and empty states	Icon · one-line message · one action	Sync failure (amber), AI unavailable (neutral with counts), all caught up (green), no results (neutral with "Clear filters").

6. SCREEN SPECIFICATIONS

6.1 Dashboard

Region	Content and rules
Greeting row	"Good morning, Priya" · date · team and headcount ("Product · 50 people")
AI brief card	Accent-tint card, 4 lines max: top work, what happened, needs you now, who is blocked. "Regenerate" and thumbs feedback. Fallback shows counts.
KPI tiles (4)	Needs you (P1+P2 open) · Blocked (people) · In progress (team items) · Done today with completion ring. Each tile links to a filtered Radar.
Status overview	Horizontal stacked bar of today's items by status — Done, In progress, Pending, Blocked, Snoozed — with counts in the legend.
Top priorities	Top 5 radar rows by score; "Open Radar" link. P3 never shown here.
Calendar card	Current month, coloured dots per day; hover popover with meetings; below it "Today": next 3 meetings and pending requests with free slots.
Who is blocked	Up to 5 people: photo, name, title, blocker, owner of the blocker, days waiting (magenta when over 1 day).
Team pulse	Avatar row grouped by health state with counts (On track 38 · At risk 6 · Blocked 2 · Overloaded 3 · Away 1).

6.2 Radar (priority feed)

Region	Content and rules
Header	"Radar · 32 open · ranked by priority · updated 2 min ago"
Type tabs	All · Blockers · Escalations · Approvals · Asks · Meetings — each with a live count
Filter bar	Search · Source · Priority · Status · Person · Team · Date · Sort (Priority score, Waiting longest, Due soonest, Newest, Person A–Z)
Table columns	Rank · Priority / item (chips, extract, reason) · Source · People (avatar stack) · Status · Age · Actions
Grouping	P1 and P2 expanded; "Show 18 P3 items" collapsed at the bottom
Bulk actions	Checkbox per row; bulk Snooze, Assign, Done; all reversible from the Activity Log
Pagination	20 rows per page; keyboard J/K to move, Enter to open, O to open source

6.3 Item detail drawer

Opens over any list. Header: priority and status chips, type, title, source references, age. Sections: **AI context** (2–3 bullet notes, generated on open, labelled "AI notes"); **Why ranked** (five bars: Type, Urgency, Sender, Waiting, Impact, with points); **People** (photos, names, titles, roles: requester, owner, blocked by); **Timeline** (source events with times); **Linked items** ("also in Slack #backend"); **Actions** with "Open in source" as the primary button.

6.4 Calendar

Region	Content and rules
Views	Month (default) · Week · Day; legend of event colours at the top
Month grid	Up to 3 dots per day + "+n"; selected day filled accent; today ringed accent
Hover popover	Date heading · list of meetings (time, colour bar, title, attendee avatars, location or link) · pending requests (dashed amber) with "Copy free slot" · "Open in Google Calendar"
Right panel	Meeting requests from Slack, Gmail and Jira, sorted by requested date, each with the requester's photo, next free slot and "Open request" link

6.5 Team

Region	Content and rules
Summary tiles	Members 50 · On track · At risk · Blocked · Overloaded, each clickable as a filter
View switch	Cards (default) or Table

Member card / row	Photo (Slack/Google), name, title, team, health pill, progress bar (% of assigned items done this sprint), open and blocked counts, last activity, Slack DM and email icons
Sort and filter	Sort: Health (blocked first), Open items, Name, Team. Filter: Team, Health, Role
Member panel	Their open radar items, blockers, recent updates and upcoming meetings with the PM

6.6 Activity Log (the PM's own actions)

Region	Content and rules
Summary	Today: 9 done · 4 assigned · 3 snoozed · 12 sources opened
Timeline	Newest first: time · action icon · item · person involved · "Undo" (within the day) or "Restore"
Tabs	Today · This week · Done archive · Snoozed · Assigned by me
Protection rules	No permanent delete anywhere. Done items stay restorable for 30 days; Snoozed items return automatically; Assigned items show their current status from the source tool.

6.7 What Happened

Last 24 hours of team updates, grouped by team, newest first: who (photo and name), what (merged PR, moved to Done, shipped release, closed bug), source mark and link. Filter by team, source and time window.

6.8 Integrations and Settings

Tab	Content and rules
Integrations	Cards for Slack, Jira, GitHub, Gmail, Google Calendar: status, last sync, toggle, "Manage" (shows read-only permissions and excluded channels or projects). Connect uses OAuth sign-in; Jira also accepts an API token. Keys are stored encrypted and never displayed after saving.
Appearance	Theme: Light · Dark · System; density: Comfortable · Compact
AI brief	Brief on/off, delivery time, include: asks, blockers, approvals, meetings; priority threshold shown in brief
Priority rules	VIP senders (founders, customer domains), working hours, show P3 by default (off)
Team tags	The three tags (@pm blocker, @pm decision, @pm sync) with copyable team guide
Notifications	Desktop alerts for new P1 only (default), daily digest on/off

6.9 Empty and error states

State	Message and action
All caught up	Green check · "You're all caught up · 9 items closed today" · View Done
No results	"No results for 'kubernets upgrade'" · suggestion · Clear filters
Source sync failed	Amber banner on every page: "Jira couldn't sync · showing data from 47 min ago" · Retry · Reconnect
AI unavailable	Brief card shows counts: "4 need you · 2 blocked · 9 done" · Try again
First run	Three steps: connect tools · share the team tags · how P1, P2, P3 work

7. SORTING AND FILTERING RULES

List	Default sort	Available filters
Radar (All)	Priority score, highest first; ties by waiting time	Type, source, priority, status, person, team, date
Blockers	Days blocked × people affected	Team, person, blocked by
Approvals / permissions	Overdue first, then due soonest	Requester, source
Meetings	Requested date, soonest first	Requester, internal / external
Asks	Sender weight, then waiting longest	Person, source
Team	Health: Blocked → At risk → Overloaded → On track → Away	Team, health, role
Activity Log	Newest first	Action type, date

8. DATA DISPLAY RULES

- **Numbers:** tabular figures; thousands separator; always with a label; deltas as "+2 since yesterday" in secondary text.
- **Time:** relative under 24 h ("40 m", "3 h"), then "2 d"; exact time on hover. Dates as "Tue 27 Oct".
- **Text:** extracts truncated at one line with ellipsis; full extract on hover.
- **People:** photo from Slack profile first, Google profile second, initials last; title from Slack profile field.
- **Sources:** official 16 px marks for Slack, Jira, GitHub, Gmail, Google Calendar, plus the reference in monospace (JIRA · PAY-412).
- **Accessibility:** text contrast ≥ 4.5:1; status and priority always carry text, never colour alone; full keyboard support; visible focus ring 2 px accent.
- **Responsive:** ≥ 1280 px three columns; 1024–1279 px right rail moves below; under 768 px sidebar becomes bottom tabs and drawers open full screen.

9. GAP ANALYSIS: CURRENT DESIGN VERSUS THIS SPECIFICATION

Area	Current design (v1 screens)	Add or change
Navigation	Dashboard, Priority Feed, Activity Feed, Blockers & Risks, Team, Integrations, Settings	Rename Priority Feed → Radar; add Calendar and Activity Log (PM's actions); move Blockers into Radar tabs
Status colours	Priority chips only	Add status pills (Not started, In progress, Pending, Blocked, Assigned, Scheduled, Snoozed, Done) and the status overview bar
Calendar	Meeting appears only as a feed item	Month calendar with coloured dots, hover popover, free slots beside requests
People	Initials and names	Profile photos from Slack/Google, titles, presence dot, hover card with DM and email links
Team	Table with completion bar and status	Health-tinted cards, overloaded state, sort by health, member panel
Undo and history	Not present	Toast with Undo; Activity Log with Restore; no permanent delete
Theme	Light only	Light, dark and system themes using the token table
Integrations	Connected list with toggles	Card grid with status, last sync, permissions, OAuth / API token

10. GOOGLE STITCH PROMPTS

Paste the global prompt first, then one screen prompt at a time. Keep the same project so the style carries over.

Global style prompt

Design a desktop web app called WorkRadar for a startup product manager named Priya. Style: clean, modern SaaS, Inter font, 14 px body, generous white space. Left sidebar 248 px, dark navy #0B1B3F, inactive labels #AEBBD6, active item filled #2454E6 with white text. Page background #F5F7FB, white cards with 12 px radius, 1 px border #E3E8EF and subtle shadow. Accent blue #2454E6. Priority chips are rounded rectangles: P1 Critical red text #B42318 on #FEE4E2, P2 High orange text #C4320A on #FFE6D5, P3 Normal grey text #475467 on #F2F4F7. Status pills have a dot: In progress blue #2E90FA, Pending yellow #EAAA08, Blocked magenta #DD2590, Assigned teal #15B79E, Scheduled indigo #6172F3, Snoozed violet #7A5AF8, Done green #17B26A. Use Lucide line icons, no emoji. Show real-looking profile photos with names and job titles. Top bar: page title, search with Cmd K hint, "All sources synced 2 min ago", bell, light/dark toggle, profile avatar.

Screen 1 — Dashboard

Dashboard screen. Greeting "Good morning, Priya" and "Tuesday, 27 Oct · Product · 50 people". A light-blue card titled "Your day in 30 seconds" with four short lines: top work, what happened, needs you now, who is blocked, plus Regenerate button. Four KPI tiles: Needs you 7, Blocked 2 (magenta), In progress 14 (blue), Done today with a circular progress ring at 62% amber showing "5 of 8 closed". A horizontal stacked status bar (Done, In progress, Pending, Blocked, Snoozed) with counts. Left column: "Top priorities" list of 5 rows, each with rank, priority chip, type chip with icon, one-line description, reason in grey, source logo and reference like "JIRA · PAY-412", owner avatar and status pill. Right column: month calendar for October 2026 with small coloured dots under dates (blue team, teal 1:1, orange customer, violet review), today ringed, and a hover popover open on 28 Oct listing 3 meetings with times and attendee avatars. Below it "Who is blocked" with two people: photo, name, title, blocker, days waiting in magenta. Bottom: "Team pulse" avatar groups by On track, At risk, Blocked, Overloaded.

Screen 2 — Radar

Radar screen, a ranked priority table. Header "Radar · 32 open · ranked by priority". Tabs with counts: All 32, Blockers 2, Escalations 1, Approvals 6, Asks 9, Meetings 4. Filter bar with search and dropdowns Source, Priority, Status, Person, Team, Date and a Sort menu set to "Priority score". Table columns: #, Priority and item (priority chip, type chip, one-line description, grey "why: waiting 2 days"), Source (logo + reference), People (avatar stack), Status pill, Age, Actions (Open, Done, Snooze, Assign). P1 rows have a thin red left edge. At the bottom a collapsed row "Show 18 P3 items". Include a toast at bottom-left: "Marked done · Saved in WorkRadar only · Undo".

Screen 3 — Item detail drawer

Show the Radar screen dimmed with a 480 px drawer open on the right for "Rahul blocked on SSO API keys". Header with P1 Critical chip, Blocked pill, Blocker type, references "JIRA · AUTH-221" and "SLACK · DM", age 2 d. Section "AI notes" with 3 bullets. Section "Why ranked" with five horizontal bars and points: Type 32, Urgency 6, Sender 5, Waiting 20, Impact 10, total 73. Section "People" with photos, names, titles and roles (requester, blocked by). Section "Timeline" with timestamps. Primary button "Open in Jira", secondary buttons Done, Snooze, Assign.

Screen 4 — Calendar

Calendar screen with Month / Week / Day switch and a colour legend (Team, 1:1, Customer, Review, Pending request, Free slot). Month grid for October 2026 with up to three coloured dots per day and "+2" where there are more. A hover popover on Thursday 29 Oct shows meetings with colour bars, times, titles and attendee avatars, plus a dashed-yellow pending request "Design sync requested by Sneha" with a "Copy free slot 11:30" button. Right panel "Meeting requests" lists 4 requests from Slack, Gmail and Jira with requester photo, requested time, next free slot and "Open request" link.

Screen 5 — Team

Team screen. Summary tiles: Members 50, On track 38, At risk 6, Blocked 2, Overloaded 3. Toggle Cards / Table, filters Team and Health, sort "Health". Grid of member cards: profile photo, name, job title, team, health pill (On track green, At risk yellow, Blocked magenta, Overloaded orange), progress bar with percentage, open and blocked counts, last activity, Slack and email icon buttons. Blocked cards have a soft magenta background tint #FDF2FA.

Screen 6 — Activity Log

Activity Log screen showing what the PM did. Summary: 9 done, 4 assigned, 3 snoozed, 12 sources opened today. Tabs: Today, This week, Done archive, Snoozed, Assigned by me. A vertical timeline, newest first: time, action icon, action text ("Assigned PAY-412 to Karan Rao"), person avatar, status pill, and an "Undo" or "Restore" link. Note at top: "Nothing is deleted — restore any item for 30 days".

Screen 7 — Integrations and Settings

Settings screen with tabs: Integrations, Appearance, AI brief, Priority rules, Team tags, Notifications. Integrations tab: card grid for Slack, Jira, GitHub, Gmail, Google Calendar, each with logo, description, status (Connected green, Needs attention amber), "Last sync 2 min ago", toggle and "Manage" link showing read-only permissions. Appearance tab preview: theme options Light, Dark, System as three selectable preview tiles.

Screen 8 — Empty and error states

One screen with four panels: "You're all caught up" with a green check and "9 items closed today"; "No results" with Clear filters; an amber banner "Jira couldn't sync · showing data from 47 min ago" with Retry and Reconnect; and an AI brief card in fallback mode showing counts only with "Try again".

Dark theme variant

Recreate the Dashboard in dark theme: page #0B1220, cards #111A2E, borders #24314D, text #E6EAF2, secondary text #9AA6BD, accent #4C7DFF. Keep the same status and priority hues with 16% opacity backgrounds.
